

1. Describe what you have been learning at Girls Who Code.

- Learning to develop, create, and problem-solve using different coding languages
 - Scratch, python
- More than that it's learning to hone communication skills w each other through these new coding languages
 - Amazing to see us girls who come from all diff backgrounds be able to tackle new challenges in all sorts of creative ways

2. What has your experience at EA been like (including the events and speaker engagements we've had so far)?

- It's been really fun!
- Place where we have met with leaders like CTO and Head of Diversity Outreach
- Been a lot more social then i thought
- I saw real innovation through creative jam, teams from all over the company - austin - pitched their prototype game ideas live audience
- Interactive, social, everybody had good time

3. How has Girls Who Code impacted you thus far?

- Honestly transformed my perception of coding
- I've done a little coding before, now gained confidence and motivation for pursuing many complex puzzles that make up computer science
- All girls environment extremely supportive
- New friends all over bay area + beyond

4. What did you do today @ Sims?

- Behind the scenes of Sims tour
- Interesting to see quality and passion for adapting to the gamer experience
- What makes sims so special is it's personal, simulated world that pushes limits of user's imagination with avatars that are very human-like
